

## Bellows Insulation Covers

Our insulation covers are supplied in two specifications for regular and high temperature applications. Both are suitable for indoor and outdoor use and can be manufactured to suit any size and configuration, including elbows.

They are easily fitted and removed and give a presentable finish to enhance any installation. With no exposed fibres to cause irritation, and no asbestos fibres used in their fabrication, they are very user-friendly.

They are fitted and removed in seconds, without the need for specialist skills, equipment or tools.

Oil and water-resistant and with excellent thermal performance, they have proven durability and represent outstanding value for money.

### Regular Service (10 to 250 degrees Celsius operational temperature)

- For use on low pressure steam, MTHW, LTHW, HWS and process lines
- Low cost solution giving fast payback time
- Removable & reusable
- Weather resistant and UV-stable
- Long lasting & durable
- Protect employees & equipment

### High Temperature Service (250 to 600 degrees Celsius operational temperature)

- For use on high pressure steam, exhaust gas, liquid lead, process lines, hot gas and oil
- Removable & reusable
- Reduce ambient air temperature
- Weather resistant and UV-stable
- Long lasting & durable
- Improve equipment efficiency and longevity
- Protect employees & equipment
- Reduce emissions
